III. Consolidation of Comments/Remarks

Create an Event	No error checking for invalid dates.
-----------------	--------------------------------------

Delete an Event	No confirmation dialog for deletion.
Edit an Event	Says it stopped???
View an Event	None.
View all Events	Not sorted according to event's name. No sorting.
View Map	None.
Get Location	Hard to pick location, sensitive to touch. Not shown on view event, need to view map.
Crashes Gracefully	BAD.
Tester's Comments	None.
1	Map is too general Simple, too simple. Crashed from viewing map.
2	Back button? Crashes when viewing an event then uses the app's back button. Back button can cause an error. Crashed from viewing map.
3	No need for settings option, remove. Maybe the user can have the option to modify the font size. Make fonts bigger. Text are too small.
4	None.
5	Yes, very flat :-bd Settings button does nothing.
6	None.
7	No notifications No message if action was successful.
8	None.
9	None.
10	When the app is in landscape, the save button obscures other elements.
11	It would be cute if it had other color schemes.
12	None.
13	Nakaklito yung '+' new entry. Bigger icons.
14	Too small font. Optional: give ergodicity(control fonts/color scheme/font size) Can still be improved, maybe provide a zoom option? Zoom not allowed. Not visually friendly for visually impaired people. Make font size.

15	Map.
16	No confirmation dialog box. Because it is not implemented, it would be very beneficial to have an undo button for deleting or a recycle bin for events.
17	None.
18	None.
19	None.
20	None.
21	No recommendations on how to recover from errors. No errors experienced.
22	Location Back.
23	No Explanation.
24	No help text.
25	No instructions. In the map, it wasn't clear you had to save.
Tester's Comments	Just a notepad of events with location added. Would be nice if provided with a better locator of the location from the map. This is good, with a few more improvements, this can be popular to the market. Medyo kulang sa "buhay" pero functional naman. No errors. Why it crash?

IV. Reflection of the Group

As the developers of the program, we've realized that pressure may be needed in order for a group to perform better; the complacency that comes to those not experiencing any pressure to perform, to work, to deliver can cause us not to work adequately or at all.
